Accessories:

KL-0580-43 KA Locking Tool Set

Suitable for the BMW 4- and 6-cylinder TwinCam engines M42, M44, M50 and M52 with VANOS-System.

This tool is used for locking and/or positioning motor shafts such as camshafts and crankshafts, as well as for pretensioning timing chains when adjusting camshaft timings. It is required, for example, when replacing a timing chain, during the removal and replacement of the VANOS-System, or during an engine repair.
